# *ChartMaker® PatientPortal*

## Added Features

- **Clinical Summary –** The PatientPortal has been updated with a new style sheet to render clinical summaries that comply with Meaningful Use Stage 2 requirements and are in C-CDA format.

- **Clinical Summary –** The PatientPortal has been updated with the ability for patients and patient representatives to download patient health information (clinical summaries). Whenever the patient health information is viewed or downloaded, the date and time, user name, and action are recorded in the active history log, as well as counted toward any applicable Meaningful Use Stage 2 objectives and measures.

- **Clinical Summary –** The PatientPortal has been updated with the ability for patients and patient representatives to transmit their patient health information (clinical summaries) as a direct message. The user may enter an direct email address and select a clinical summary to send to a provider. When a message is sent, the user will have a sent item in their sent items box and the activity history log will show a transmitted action. If the message errors when it is sent to SureScripts, the patient will get an error message created in their inbox with the error details.

  Whenever the patient health information is transmitted, the date and time, user name, and action are recorded in the active history log, as well as counted toward any applicable Meaningful Use Stage 2 objectives and measures.

- **Clock –** The PatientPortal has been updated with a clock that is synced with a NTP clock.

- **Demographics –** The PatientPortal has been updated so that the Gender field has been renamed to Sex to adhere to ONC and CMS standards.

- **Race –** The PatientPortal has been updated to allow the patient or patient representative to select and view multiple races for the patient, when applicable.
