

MIPS Year 4 (2020)

New Quality Measures for Inclusion in MIPS

Quality#: 476 – International Prostate Symptom Score (IPSS) or American Urological Association-Symptom Index (AUA-SI) change 6-12 Months After Diagnosis of Benign Prostatic Hyperplasia

Description: Percentage of patients with an office visit within the measurement period and with a new diagnosis of clinically significant Benign Prostatic Hyperplasia who have International Prostate Symptoms Score (IPSS) or American Urological Association (AUA) Symptom Index (SI) documented at time of diagnosis and again 6-12 months later with an improvement of 3 points.

High Priority Measure: Yes (Patient Reported Outcome)

Collection Type: eCQM Specifications

Quality#: 477 – Multimodal Pain Management

Description: Percentage of patients, aged 18 years and older, undergoing selected surgical procedures that were managed with multimodal pain medicine.

High Priority Measure: Yes (Opioid-related)

Collection Type: MIPS CQMs Specifications

Quality#: N/A – Adult Immunization Status

Description: Percentage of members 19 years of age and older who are up to date on recommended routine vaccines for influenza; tetanus and diphtheria (Td) or tetanus, diphtheria and acellular pertussis (Tdap); zoster; and pneumococcal.

High Priority Measure: No

Collection Type: MIPS CQMs Specifications, CMS Web Interface Measure Specifications

Quality#: 478 – Functional Status Change for Patients with Neck Impairments

Description: This is a patient-reported outcome performance measure (PRO-PM) consisting of a patient-reported outcome measure (PROM) of risk-adjusted change in functional status (FS) for patients aged 14+ with neck impairments. The change in FS is assessed using the Neck FS PROM.* The measure is risk-adjusted to patient characteristics known to be associated with FS outcomes. It is used as a performance measure at the patient, individual clinician, and clinic levels to assess quality.

*The Neck FS PROM is an item-response theory-based computer adaptive test (CAT). In addition to the CAT version, which provides for reduced patient response burden, it is available as a 10-item short form (static/paper-pencil).

High Priority Measure: Yes (Patient Reported Outcome)

Collection Type: MIPS CQMs Specifications
