Quality Measures Removed from Traditional MIPS Year 8 (2024) but Retained for MVPs

Quality Measures Removed from Traditional MIPS but Retained for MVPs
Beginning with CY 2024 performance period, the following measures will be maintained for MVP implementation. Q112 and Q113 will be maintained for the purpose of the CMS Web Interface collection type available to Shared Savings Program ACOs reporting through the APP. These 3 measures have been finalized for removal from Traditional MIPS pathway starting CY 2024.

***Quality #: 112**
Title: Breast Cancer Screening
Rationale for Partial Removal: A more robust and comprehensive measure is finalized under the Preventive Care and Wellness (composite) and the clinical concept of this measure is included as one of the components. However, the clinical concept of this measure is appropriate and applicable for some MVPs; therefore, we finalized removal of this measure from traditional MIPS and finalized retention of this measure for use in relevant MVPs.

***Quality #: 113**
Title: Colorectal Cancer Screening
Rationale for Partial Removal: A more robust and comprehensive measure is finalized under the Preventive Care and Wellness (composite) and the clinical concept of this measure is included as one of the components. However, the clinical concept of this measure is appropriate and applicable for some MVPs; therefore, we finalized removal of this measure from traditional MIPS and finalized retention of this measure for use in relevant MVPs.

Quality #: 128
Title: Preventive Care and Screening: Boody Mass Index (BMI) Screening and Follow-Up Plan
Rationale for Partial Removal: A more robust and comprehensive measure is finalized under the Preventive Care and Wellness (composite) and the clinical concept of this measure is included as one of the components. However, the clinical concept of this measure is appropriate and applicable for some MVPs; therefore, we finalized removal of this measure from traditional MIPS and finalized retention of this measure for use in relevant MVPs.

*Quality measures 112 and 113 have been finalized with substantive change. Please review 2024 specifications.
